Mahindra Powerol

June 2013 – June 2014, Bengaluru, India

- Built, implemented, and executed: customer relationships, closing deals, lead generation, cold outreach, customer negotiations and vendor management
- Skilled storyteller with a passion for rich creativity and focus on social impact.

PROJECTS

Research on Bhagavad-Gita – Triguna and its relationship with mental and biological health

Sampurna Institute of Advanced Studies affiliated to Martin Luther Christian University • April 2019 – September 2019

- The project study explores the Indian Indigenous concept of Triguna and its relationship with health, focusing on physiological and psychological well-being.
 - Triguna refers to three basic qualities – Sattva, Rajas, and Thamas, which influence the causes and manifestations of illness. Understanding Triguna helps maintain equilibrium and efficient living.
 - In this study, programs such as primary prevention aid by promoting Triguna balance, and secondary prevention helps through early identification and treatment of health issues. Overall, it emphasizes the significance of Triguna in achieving and maintaining holistic health.
-
